blockCipher

```
graph BT; blockCipher[blockCipher] -.->|raw| blockCipherRaw[blockCipherRaw]; blockCipher -.->|ctr, cbc, ecb| blockCipherMode[blockCipherMode];
```

The diagram illustrates a class hierarchy. At the bottom is a grey box labeled 'blockCipher'. Two dashed purple arrows point upwards from 'blockCipher' to two white boxes at the top: 'blockCipherRaw' on the left and 'blockCipherMode' on the right. The arrow to 'blockCipherRaw' is labeled 'raw'. The arrow to 'blockCipherMode' is labeled with three modes: 'ctr', 'cbc', and 'ecb' stacked vertically.
