

Harmattan - Font Features

Harmattan is an OpenType-enabled font family that supports the Arabic script. It includes a number of optional features that provide alternative rendering that might be preferable for use in some contexts. The sections below enumerate the details of these features. Whether these features are available to users will depend on both the application and the rendering technology being used. Some applications let the user control certain features such as Character Variants to turn on the rendering of variant characters. However, at this point, most applications do not make use of those features so another solution is needed to show the variant characters. For applications that do not make use of the OpenType Character Variants, you can now download fonts customized with the variant glyphs you choose. Read this document, visit [TypeTuner Web](#), then choose the variants and download your font.

See [Using Font Features](#). Although that page is not targeted at Arabic script support, it does provide a comprehensive list of applications that make full use of the OpenType font technology.

See also [Arabic Fonts — Application Support](#). It provides a fairly comprehensive list of applications that make full use of the OpenType font technology.

This page uses web fonts (WOFF) to demonstrate font features and should display correctly in all modern browsers. For a more concise example of how to use Harmattan as a web font see *harmattan-webfont-example.html* in the font package web folder.

If this document is not displaying correctly a PDF version is also provided in the documentation/pdf folder of the release package.

Complete feature list

Language system tags

Affects: U+062F, U+0630, U+0688..U+068F, U+0690, U+06EE, U+0759, U+075A, U+08AE, U+0645, U+0765, U+0766, U+08A7, U+0647, U+0626, U+060C, U+061B, U+06F4, U+06F5, U+06F6, U+06F7, U+0650, U+064F, U+064C, U+0657

Unfortunately, the UI needed to access the language-specific behavior is not yet present in many applications.

- LibreOffice supports language-specific behavior for Kashmiri (Kashmir), Kurdish (Central), Kyrgyz (China), Malay (Arabic), Sindhi (Arabic), and Urdu (Pakistan). There is not yet support for the Rohingya or Wolof languages.
- Microsoft Word 2019 and 2021 support language-specific behavior for Kashmiri (Arabic), Kurdish (Central), Sindhi (Arabic), and Urdu (Pakistan). Support for Kurdish (Central) has to be specifically installed. There is not yet support for the Kyrgyz, Malay, Rohingya, or Wolof languages.

Some Harfbuzz-based apps, e.g., XeTeX, can access language-specific behavior. In the past, it was not always possible to override language-specific behavior in cases where the language-specific variants were undesirable but, starting with version 4.300, the font supports this possibility.

Kurdish (Northern), Rohingya, Sindhi, Urdu

Wolof	د	ى ئى	ا	بْ	بْ	بْ	lang='wo'

Character variants

There are some character shape differences in different languages which use the Arabic script. These can be accessed by using OpenType Character Variants, or through the language support mentioned above.

Jeem/Hah

Affects: U+062C, U+062D, U+062E, U+0682, U+0683, U+0684, U+0685, U+0686, U+06BF, U+0757, U+0758, U+088A, U+08A2, U+08C1, U+08C5, U+08C6

Eastern digits

Affects: U+06F4, U+06F6, U+06F7

Feature	Sample	Feature setting
Standard	٤٦٧	cv82=0
Sindhi-style	٤٦٧	cv82=1
Urdu-style	٤٦٧	cv82=2
Kurdish-style	٤٦٧	cv82=3
Rohingya-style	٤٦٧	cv82=4
Default	٤٦٧	cv82=5

Comma

Affects: U+060C, U+061B (This feature is not recommended for use. The Unicode Standard recommends the use of ، U+2E41 and ؛ U+204F instead.)

Feature	Sample	Feature setting
Upward	؛ ،	cv84=0
Downward	؛ ،	cv84=1

Decimal separator

Affects: U+066B

Feature	Sample	Feature setting
Small reh	٫	cv85=0
Slash	/	cv85=1

Guillemet

Affects: U+00AB U+00BB U+2039 U+203A

Feature	Sample	Feature setting
Rounded	«(ب)»	cv88=0
Angled	«<<ب>>»	cv88=1

Other user font features

Line spacing

This feature is only available in TypeTuner Web.

Allows for adjustment of the default line spacing in the font (values shown are ordered in increasing line spacing).

Feature
Normal
Loose
1.0 Compatible Normal
1.0 Compatible Loose
