

# Installing Seamly2D for Windows

1. Download Seamly from your Seamly email link and save to your **Downloads** folder.

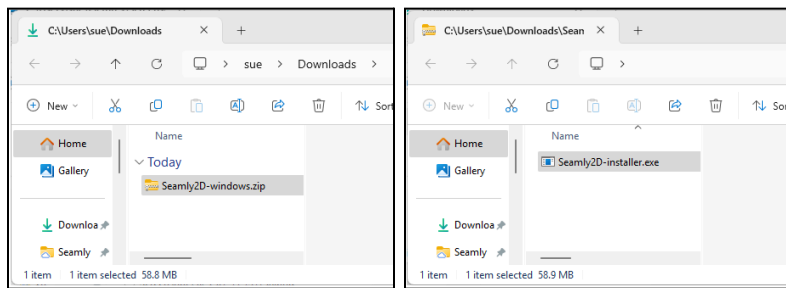

*If your browser doesn't download .zip files, change it's settings.*

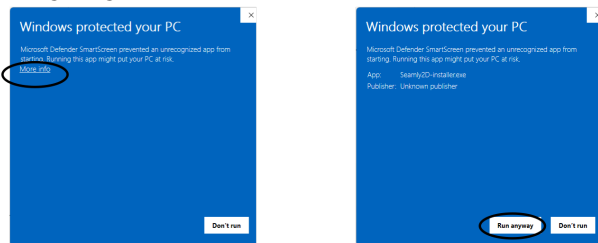

*For Chrome:*

1. Open Google Chrome and click on the three dots at the top right corner of the browser.
2. Go to Settings, then open Privacy and Security.
3. Click on Standard protection, then retry downloading from the link in the email.
4. If you're still unable to download the file, select No Protection and retry the download link.

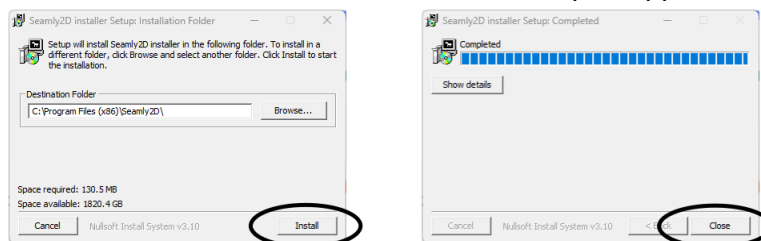

2. In your **Downloads** folder, double click to open the **.zip** file then double click on the installer **.exe** file.

3. Seamly is free and open source, and doesn't pay Microsoft to remove popup messages. Click '**More Info**', then '**Run Anyway**'.

4. Click '**Install**'. If some .dll files can't be installed, close all open applications and rerun the installer.

5. In **C:\Program Files (x86)\Seamly2D\**, highlight **seamly2d.exe**. Right click and select '**Add to taskbar**'. You can now run Seamly2D by clicking on its icon in the taskbar.
